

October ISACA Meeting Notice - Register Today!

Date - Monday, October 29, 2007

Location - One Mellon Center – Reception Center, 3rd Floor

Registration – 11:30 a.m. Lunch – 12:00 noon

“The Insider Threat – Can You Stop It?” – 1:00 p.m.

About the Program:

Your networking expertise has been exhibited by your multi-tier architecture design and distributed firewalls. You have implemented a TCP/IP monitoring solution and you regularly scan for vulnerabilities at the OS and the network level. All of this security is in place and continually updated to protect your company’s most valuable assets.... data. The reality of today’s web-connected world is that the perimeter is disappearing. Perimeter defense is no longer a viable strategy. Organizations must take a “data-centric” approach and start from the application and work outward in their security approach. Due to increasing mobility requirements, the remote device (laptop) is often overlooked and left unprotected. The threats to data in a mobile environment are not always from the outside and are often not malicious in nature. However, the industry is now waking up as the technology to protect the data on these devices is beginning to mature.

Instructor Bio

Skip Taylor

Vice President, Product Marketing, Fiberlink Communications

As vice president of product marketing of Fiberlink, Skip Taylor is responsible for Fiberlink's product strategy and positioning. He has over 20 years of experience in delivering mobile workforce solutions to companies around the world. Skip helped lead the development of Fiberlink’s innovative mobile access software, Extend360™, which provides mobile workers with simple and secure connectivity to business-critical resources. Before joining Fiberlink, Skip was Director of Product Marketing, Remote Access and Switched VPN Services, for UUNet, a MCI WorldCom company. Skip also held several sales and marketing positions with MCI WorldCom Advanced Networks and CompuServe Network Services. Skip received a Bachelor of Science degree in computer science from Ohio State University.
